

The datasets used can be found in this [DropBox](#) link

please download the processed data from the link and cp it to this path './data/processed'

To run: `xxx/python3 main.py --name DATASETNAME --episodes EPISODE --steps STEPS_PER_EPISODE --enlarge_num ENLARGEMENT_FACTOR_OF_OG_FEATURE_SPACE --batch_size 32 --memory 64` (pick numbers as you wish)

We will need to clean this version of the code up a little bit to add the order of the feature orders as a parameter
